			\$1,087,648	\$624,139	\$463,508

Report of the Executive Committee

To the Board of Directors of the

General Hospital Society of Connecticut:

Two facts stand out before all others in the conduct of the New Haven Hospital during the past year. The first of these is the large increase in the volume of work, and the second is the improved efficiency in administration as reflected in the substantial lowering of costs.

Although there was an increase of 19 per cent in the whole number of patients treated and an increase of 13 per cent in the number of patient days, the total operating expenditures rose less than 1 per cent. The cost per patient day in the wards amounted to \$6.83 as compared with \$7.06 for the previous year. This decrease of 3 per cent may be ascribed in part to the reduced cost of foodstuffs and materials, but still more, no doubt, to the higher rate of occupancy. Although the decline in the cost of foods served in the main hospital amounted to 11 per cent, the cost of raw food is a relatively small item in hospital expenses.

It is obvious that per capita costs fall as the occupancy rate rises, but equally true that in order to maintain a high rate of occupancy the Hospital must have additional income to meet the losses incurred through caring for patients who can pay only in part for their maintenance. It is gratifying to record some progress in this direction even during a financial period such as the present. The following free bed funds, some of which have been previously mentioned, have been officially added to the Hospital endowment during the past year:

The Grace Salisbury Foote Bed . . .	\$21,081.16
The Loring W. Andrews Bed . . .	10,000.00
The Dr. Jonathan Edwards and The Charles Henry Collins Beds . . .	18,000.00
The Adelaide Bushnell Curtiss Memorial	5,000.00
The Levi Goodell Fox and Elizabeth Hamlin Fox Beds	1,137.00

The total number of persons cared for at the Hospital during the past year reached the high mark of 14,614. Never before have

so many been treated in one year. It amounts practically to one out of every ten persons in New Haven; but of course it must be remembered that many patients come to the Hospital from other communities. The increase in the whole number treated amounted to 2,359. The increase in admissions to the Hospital was 754, the increase in births was 22, and the increase in emergency treatments was 1,586.

It is significant that fewer days of care were given in the Private Pavilion, while the so-called "semi-private" facilities were more extensively used. This reflects of course the general financial situation. At the same time, the great increase in the whole amount of service rendered by the Hospital cannot be ascribed to business conditions. It is fair to assume that fewer rather than more persons enter hospitals during periods of financial stress. We hope therefore that the marked growth in the use of the Hospital year after year means that the New Haven Hospital is more nearly meeting the hospital needs of the community. The population of New Haven has not grown to any extent in the last ten years, whereas the patient days at the New Haven Hospital during the past year were 80 per cent greater in number than in the year 1922-23, and the whole number of patients served was 146 per cent greater.

The decline in the use of the Private Pavilion amounted to 888 patient days, causing a loss of income, as compared to the previous year, amounting to \$21,135. This was offset in part by a decrease of \$16,365 in operating expenses, reducing the net income by \$4,770, and leaving a deficit of \$4,449. This is the first time in a number of years that the Private Pavilion has not been self-supporting, although, as noted in the Superintendent's report, the Hospital has never derived profits from the Private Pavilion, which it hopes ultimately to gain, for support of work in the wards.

At the William Wirt Winchester Hospital in the face of reduced income from endowment and a slight increase in the number of patient days, the operating deficit was decreased in amount by \$1,028, leaving a deficit of \$8,456. There was a 4 per cent decrease in the cost per patient day.

The Executive Committee has realized during the current year the need of extraordinary economies in operation, and the Super-

intendent's report shows that the staff has given its coöperation in this direction. Nevertheless, deficits have been incurred in all of the divisions—Main Hospital, Private Pavilion, and the William Wirt Winchester Hospital. It is obvious that losses in income from endowment will continue in the coming year, necessitating a still more economical operation of the plant. Your Committee has considered the possibility of salary cuts, but before taking definite steps in this direction it has decided to enlist the entire staff of the Hospital in an effort to make still further operating economies during the next six months. While we are hopeful that these economies may enable us to decrease our deficit, we are prepared to take such action as may be necessary to decrease our payrolls as of January 1, 1933.

The various developments of the year, such as the completion of the Sarah Wey Tompkins Pavilion, the remodelling of East Ward, and the organization of a social service department, dealt with by the Superintendent, are substantial evidence of the serious efforts which are being made to improve and stabilize the entire Hospital service.

Respectfully submitted,

D. SPENCER BERGER

HARRY C. KNIGHT

FRED T. MURPHY

FREDERICK H. WIGGIN

THOMAS W. FARNAM, *Chairman*

Executive Committee

Report of the Superintendent

To the Executive Committee of the Board of Directors:

UNDOUBTEDLY the most important event from the standpoint of medical treatment was the epidemic of poliomyelitis which occurred during July, August, and September, 1931. You already know the details of the work which was done in such an efficient manner by the Medical and Pediatrics Departments. Any statement which I might make in connection with this could not in any way add to the appreciation which these clinical services have received. It is doubtful, however, if the citizens of New Haven and surrounding towns fully appreciate what was done for them during this period.

The Fitkin Ward has been functioning for a period of two years. Due to the demolition of the West Ward and the Nurses' Home to provide space for the erection of the Tompkins Building it was necessary to use the fourth floor of Fitkin and the corresponding floor of the Clinic Building for the housing of semi-private cases. Not only have these services been adequately cared for in the Fitkin Building, but ward services have shown a marked increase in the number of patient days of service rendered. The clinical and nursing staffs in the building, as well as the patients, have expressed their appreciation of the splendid facilities which the unit offers.

Toward the end of the last fiscal year the new service units in the Clinic Building were put into use. The changes from the old to the new units were made in such a manner as to assure uninterrupted service. Too much credit cannot be given Miss Catnach for the efficient manner in which the transfer of the Dietary Department was handled. In January we were fortunate in securing the services of Miss Marion Dana to direct the Dietary Department. Miss Dana is well equipped by training and experience for this work. She was a teacher of institutional economics at the University of Chicago for a number of years, and was associated for two years with Miss Cora C. Colburn in the direction

of the University Dining Halls at Yale. She is a graduate of Simmons College and obtained a master's degree at Columbia. Miss Cattnach now has an opportunity of continuing her teaching in the Schools of Medicine and Nursing which she reluctantly gave up while administering the Dietary Department.

During the past year Miss Margaret Bradley has directed the Admitting Department of the Hospital. Miss Bradley came to us following a period of more than three years at the Billings Memorial Hospital in Chicago, where she went after having had experience in social work in Holyoke Hospital and medical admission work at Johns Hopkins Hospital. There has been considerable reorganization of methods and personnel in this department. After the transfer of the Dispensary from the old building to the new early in the coming fiscal year, admissions to the Hospital and outpatient department will be centralized in the new unit.

The Sarah Wey Tompkins Memorial surgical unit has been completed and opened. In many ways it is superior even to the Fitkin unit and it meets adequately the needs of the very active surgical division of the Hospital. While it is regretted that Ward A unit for women is not to be constructed in the immediate future, we are fortunate in being able to retain the East Ward, which will provide fifty beds for such demands as may arise. This building will be reconditioned before the first of the next calendar year. Certain structural alterations will be made, utility rooms will be completely re-equipped, and the building will be redecorated in the same style and color as the other units. With these improvements, the East Ward will serve a very valuable purpose until new units are available.

The Private Pavilion during the past year has not been in as great demand as formerly. For the first time in four years we are faced with the problem of an operating deficit in this unit. This is occasioned solely by the fact that the occupancy has been light. Strict economy in expenditures has resulted in decreasing the operating expense but we have not been able to overcome the loss in income. It is to be remembered in connection with this building that interest on bonds, equivalent to rental of \$22,000 per year must be met from earned income. We are looking forward with some apprehension to the next fiscal year's activities

in the Private Pavilion in spite of the fact that we shall, if necessary, make some alteration in the type of accommodation furnished and endeavor to provide for the treatment of two patients in one room, wherever possible.

The Psychiatric Clinic, which may be considered as one of the wards of the Hospital, has been functioning during the entire fiscal year. Although this clinic is physically detached from the Main Hospital, responsibility for administration and for supplying materials has been borne by the Hospital staff. The spirit of coöperation has been excellent and we are fortunate in having this additional service for the citizens of New Haven and vicinity.

The demands upon the Dispensary for service were unusually heavy during the past year. There was an increase of 27 per cent over the previous year in the number of treatments given. It is easy to understand the tax upon the facilities of the Dispensary when it is considered that in 1900, when the building was erected, the number of visits was 12,000, while during the past year the number was over 90,000. It is fortunate therefore that new quarters in the Clinic Building, at the center of the hospital group, have been completed, and that they will be occupied soon after the beginning of the coming year. Dispensary patients will then be admitted through the new main hospital entrance, on Howard Avenue. The main lobby, on the ground floor, contains the admitting desk, pharmacy, and attractive waiting room. Examining and treatment rooms of the general surgical clinics are located on the ground floor of the Sarah Wey Tompkins Memorial Pavilion, at the right of the main entrance, and outpatient clinical facilities of the general medical clinics are on the ground floor of the Raleigh Fitkin Memorial Pavilion. The pediatric, obstetrical, and gynecological clinics are on the third floor; eye, ear, nose, and throat on the fourth; dentistry and psychiatry on the second floor. Patients reach all sections by inside corridors, and each section has its own waiting room, so that the main lobby will not be congested. These new facilities for the outpatient department without doubt will add greatly to the comfort and convenience of the patients and to the efficiency of staff members.

A decrease in expense has been noted in every department. While it is obvious that further drastic economies must be made to enable the Hospital to balance its budget, I am sure that we

can count upon a continuance of the splendid coöperation of medical, nursing, and administrative staffs in working out the problems involved.

The William Wirt Winchester Hospital has continued to meet the local demand for hospitalization of acute cases of adult pulmonary tuberculosis. The statistical tables appended show the extent and cost of the work accomplished during the year. Operating expenses have again exceeded income and it has been necessary to draw upon capital funds to meet the deficit. With the addition in the near future of more than 400 beds for tuberculosis in state institutions, it may be expected that the demand upon the Winchester Hospital will be less than during the past year. The Hospital exerts a leadership in its field, however, which merits full support.

Respectfully submitted,

ALBERT W. BUCK,
Superintendent.

James A. Hamilton	Rev. Anson Phelps Stokes
Mrs. Katharine F. Harvey	Hayes Q. Trowbridge
Clarence R. Hooker	Mrs. Rutherford Trowbridge
	Mrs. M. C. Winternitz

**Deceased*

†Previous to the amendment of the constitution of The General Hospital Society in 1919, persons contributing at any one time \$1,000 became vice-presidents for life; contributors of \$500, life directors; contributors of \$50, life members; and contributors of \$25, members for ten years. The Act of March 20, 1919, omitted the class of life directors and provided that contributors of \$500 should be life members; of \$25, annual members. Those enumerated in the list as life directors are, therefore, those who qualified before the amendment of 1919.

Life Directors

Dr. Louis B. Bishop
Miss Elizabeth W. Farnam

Henry Farnam
Thomas W. Farnam

Tracy Farnam

Life Members

William L. Andrews
Prof. Roswell P. Angier

AUDITORS' CERTIFICATE

*To the Union & New Haven Trust Company, Treasurer,
The General Hospital Society of Connecticut,
New Haven, Connecticut.*

We have audited the accounts of

THE GENERAL HOSPITAL SOCIETY OF CONNECTICUT

for the fiscal year ended June 30, 1932.

The plant assets, included as capital assets, are shown at book values, before providing for depreciation. No value is carried for certain buildings constructed by Yale University and occupied by New Haven Hospital.

Subject to the foregoing, we certify that, in our opinion, the preceding balance sheet sets forth the financial position of the Society as at June 30, 1932, and that the accompanying summary and supplementary schedules of income and expenses show the results of its operations for the fiscal year then ended.

LYBRAND, ROSS BROS. & MONTGOMERY,

Accountants and Auditors.

New York, August 10, 1932.

The New Haven Hospital and the New
Haven Dispensary both are beneficiaries
of the New Haven Community Chest.
